1. What changes need to be made to models.py? Be specific about what changes should be made to which model classes.
 - Instructor model: the instructor_id should be replaced by an OneToOneField attribute instead of an auto-generated value.
 - Student model: the student_id should be replaced by an OneToOneField attribute instead of an auto-generated value.
2. What changes need to be made to urls.py? Be specific about the URL paths that would be added.
 - Instructor: a path called 'instructor/self', where instructors can view their own information. It leads to a new view of the corresponding instructor.
 - Student: a path called 'student/self', where students can view their own information. It leads to a new view of the corresponding student.
3. What changes need to be made to views.py? Be specific about which new views would be added.
 - InstructorSelf Class: there is a get_context_data function in the model, returning the user information and sections the user teaches.
 - StudentSelf Class: there is a get_context_data function in the model, returning the user information and registrations the user has.
4. What changes would need to be made to forms.py? Be specific about the new forms that would be added.
 - InstructorForm Class: add a clean_instructor_id function, returning cleaned_data['instructor_id'].strip()
 - StudentForm Class: add a clean_student_id function, returning cleaned_data['student_id'].strip()
5. What changes would need to be made to templates. Be specific about templates that would be changed and templates that would be added.
 - Instructor: add an HTML file called instructor_self, displaying First Name, Last Name, and Sections of the user.
 - Student: add an HTML file called student_self, displaying First Name, Last Name, and Registrations of the user.
